DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. § 102(b) as being anticipated by Beauchamp. (U.S.5,825,378)

Beauchamp (col.4, line 36 – col.5, line 50) discloses the instant claimed image recording apparatus comprising:

a recording head for recording an image, said recording head having plural recording elements arranged along a first direction, said recording head moving relatively to a recording material to record a test pattern in a margin of said image;

detection means (7) for detecting said recorded test pattern (6);

a test pattern analyzer (as shown by encoder 12; fig.11) for analyzing signals from said detection means; said test pattern analyzer calculating deviation in relative movement or relative speed of said recording material or said recording head;

Art Unit: 2861

and a correction means (as shown by processor 16; fig.11) for correcting said relative movement or said relative speed on the basis of said deviation calculated by said test pattern analyzer.

Allowable Subject Matter

3. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Pertinent Prior art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
